POWERED BY THE SUN

Skyfuel construction grade solar paving lights beautify your home, business or community landscape, come in a wide range of affordable styles and colors, are easy to install, have no batteries to change, are no maintenance, 100% waterproof, can be driven on, are UV protected against discoloration by the sun and manufactured to operate in the harshest winter climates without degradation in performance.

Skyfuel's solar paving lights are manufactured in an ISO 9001 certified facility using brilliant high quality LED lights and a patented ultra capacitor storage device rather than rechargeable batteries. The decorative outdoor paving lights are manufactured with a quality of performance recognized to meet or exceed the highest levels of international architectural and construction grade design.

Thanks to their characteristics of no maintenance, durability and wide operating temperature range, Skyfuel paving lights can be installed anywhere. Installation itself is very easy. They can be placed anywhere you like without the range constraints of wire. When they are installed in a garden, patio, fountain, stairway, sidewalk, swimming pool deck, building exterior, driveway, roadway, bike or garden path they not only beautify the evening landscape but also act as a guide for pedestrian or vehicular traffic. Install Skyfuel solar paving lights wherever you can imagine adding beauty.
